FOREWARD

The tables which follow in this booklet show the total receipts at licensed primary elevators located at prairie shipping points, of the principal grains - wheat, oats, barley, rye, flaxseed and canola, for the crop year 1989-90, firstly by province and secondly by train runs within grain loading blocks. Also shown are average annual deliveries at each point over the 10-year period 1979-80 to 1988-89.

The total primary elevator capacity (expressed in wheat equivalent tonnes), number of companies, and number of elevator licences at each individual point as of August 1, 1990 are shown in the initial columns.

In certain instances the reader will note that the elevator capacity figure is not quoted; this would indicate that the licence had not been renewed for the 1990-91 season. In other instances there is no figure shown against the 1989-90 deliveries by the 10-year average handling is shown. This indicates that the elevator did not receive any grain during the past crop year.

Primary elevator points falling into train run '00' are, in most cases, no longer licensed facilities; hence do not have a train run assigned to them. Those points which are not 'on track' are also included in the '00' train run.

The 10-year average figure in all instances reflects the average deliveries of each delivery point for the number of years in which each received grain within the preceeding ten crop years. In calculating the shipping block and provincial 10 year averages, the sum of delivery point totals rather than the sum of delivery point averages is used. The latter method was used prior to 1986-87.

Effective with the 1984-85 crop year, the Canadian Grain Commission allowed operators of primary elevators to licence two or more adjacent facilities, which were under the control of a single manager, as a single primary elevator. This is evident in the reduced 'number of elevators' at individual delivery points.

NOTE: ALL DELIVERIES AND CAPACITY DATA ARE EXPRESSED IN THOUSAND OF TONNES

For further information, contact the Economics and Statistics Division of the Canadian Grain Commission at (204) 983-7905.

December - 1990
Price \$12.00 per year

AVANT-PROPOS

Les tableaux que renferme ce livret indiquent, d'abord par province, ensuite par parcours ferroviaires à l'intérieur des zones d'expédition, le total des arrivages des grains principaux, soit le blé, l'avoine, l'orge, le seigle, le lin et le canola pour la campagne agricole 1989-1990, aux silos primaires agréés qui sont situés aux points de collecte des Prairies. Ces tableaux comportent également la moyenne des livraisons annuelles à chaque point de collecte pendant la décennie de 1979-1980 à 1988-1989.

La capacité totale du silo primaire (exprimée en équivalence de tonnes métriques de blé), le nombre de compagnies et le nombre de licences de silos à chaque point de collecte, au 1^{er} août 1990, sont indiqués dans les premières colonnes.

Dans certains cas, le lecteur constatera que la capacité du silo n'est pas signalée; c'est le cas du silo dont la licence n'a pas été renouvelée pour la saison 1990-1991. Dans d'autres cas, aucun montant n'est indiqué à l'égard des livraisons de 1989-1990, seule la moyenne de dix ans est indiquée. C'est l'exemple d'un silo où aucune livraison n'a été faite durant la dernière campagne agricole.

Les silos primaires situés le long d'un parcours ferroviaire '00' ne sont plus, dans la plupart des cas, des installations agréées; donc, aucun train ne leur est assigné. Les silos qui ne sont pas situés le long des voies sont également inclus dans les parcours '00'.

Dans tous les cas, la moyenne de dix ans traduit la moyenne des livraisons à chaque point de collecte pour le nombre d'années au cours desquelles chacun des silos a reçu du grain durant les dix campagnes agricoles précédentes. En calculant les moyennes sur dix ans par zone d'expédition et par province, on utilise le total des points de collecte plutôt que le total des moyennes par point de collecte. Cette dernière méthode était utilisée avant 1986-1987.

Depuis le début de la campagne agricole 1984-1985, la Commission canadienne des grains accepte de délivrer une seule licence aux exploitants de deux silos ou plus lorsque ces silos sont exploités par une seule personne et qu'ils sont attenants. La réduction du nombre de silos aux points de livraison en est la preuve.

NOTA: TOUTES LES DONNÉES CONCERNANT LES LIVRAISONS ET LA CAPACITÉ SONT EXPRIMÉES EN MILLIERS DE TONNES MÉTRIQUES.

Pour de plus amples renseignements, communiquer avec la division de l'Économie et de la Statistique de la Commission canadienne des grains au (204) 983-7905.
